Most of these introductory areas are the same or similar across all her manuals and cover things like: Learning Outcomes, Aims & Objectives, Accurate Indicator Muscle Reflex Testing, Circuit Locating, Pre Checks, Goal Setting, Age Recession. If you have any of her manuals already or are acquiring multiple titles you may get initial pages of common information.

each description is a list or quick reference of each of the acupuncture points along the meridian (numbered & with metaphorical name).

Following that the book launches into a description of each acupuncture point, meridian by meridian (that is, 12 major and the 8-extras). Each point is covered under the heading of 'Virtues' and 'Disharmonies'. These descriptions are quite detailed and are written to indicate physical, mental, emotional & spiritual strengths, blockages, expressions, actions, character, purposes and more.

The author refers to the acupuncture points as 'Energy Release Points', so their discussion is also centered around unblocking, activating and releasing.

This book has truly remarkable and sought after information. Whether used consistently in the clinic or occasionally pulled off the home bookshelf, it will no doubt become a very important and useful reference.

Beyond the Sea Squirt by Moira Dempsey \$25

RMTi follows a drug free approach to postural, learning, sensory, emotional and behavioural challenges. It does this by using movements and activities that replicate the innate movements made by a developing foetus and infant that are necessary to integrate primitive reflexes, establish life-long movement patterns, grow the brain, develop head

control and muscle tone. Beyond the Sea Squirt is for those interested in RMTi (Rhythmic Movement Training Int.) and the stories of some of those who have used the programme to make beneficial changes.
